

Name: Erin Ruby

Title: BeFit Personal Training Scheduling Service

Project Summary: A scheduling service that allows a personal trainer to schedule personal training sessions that members can buy. They will set the price of a personal training session pack. Members can purchase session packs and reserve sessions with a specific trainer.

Project Requirements:

ID	Actor	Requirements
01a	Trainer	A new trainer can create an account so they can then add sessions to the schedule
02a	Member	A new member can create an account so they can buy punch passes and book sessions with a trainer.
01b	Trainer	Add a private session opening to the schedule. Members can only book open sessions. Each session will be assigned a day, time and trainer. Open sessions will be viewed on the schedule.
01c	Trainer	Edit private session. A trainer that wants to change the date, time or trainer for a session can update it.
01d	Trainer	View session schedule. An output of each day with the available sessions that members can book.
02b	Member	View session schedule. An output of each day with the available sessions that members can book.
02c	Member	Members can buy punch passes that can be used towards personal training sessions.
02d	Member	Members can view how many punch passes they have on their account.
02e	Member	Member can book a personal training session. Given the session ID from the schedule, they can reserve that session, and it will be removed from the available schedule.
